BOT FLY FACTOIDS:

- THE "HUMAN" BOT FLY WERE COME TO KNOW AND LOVE, IS ACTUALLY MORE ACCUSTOMED TO FEEDING ON MONKEYS. AS IT IS TECHNICALLY A PRIMATE-SPECIFIC PARASITE.
- THERE ARE QUITE A NUMBER OF BOT FLY SPECIES OUT THERE, ALL WITH THEIR SPECIFIC TARGETS. BETHY CATS, HORSES COWS, DOGS, MICE, SHEEP... ETC.
- THE BOT-FLY ITSELF IS ACTUALLY SO LARGE AND INCONSPICUOUS THAT IT HAS TO SNAG SOME UNSUSPECTING, BYSTANDER (FLY OR MOSQUITO). IT GRABS EM! AND GLUES ITS EGGS ALL OVER THEIR ABDOMEN, LEAVING THEM UNHARMED, BUT BURDENED WITH 10 TO 50 EGGS. THE MESSENGER FLOATS OFF TO FIND A MEAL (THE HOST) AND THE HOST CAUSES THE EGGS TO HATCH, DROP OFF THE MESSENGER, AND BURROW UNDER THE SKIN VIA AN ABRASION, WOUND OR THE BUG BITE OF THE MOSQUITO ITSELF.
- AS THE BOT FLY LARVA GROWS, YOU'LL ACTUALLY BE ABLE TO SEE + FEEL IT MOVING UNDER THE SKIN.
- BOT FLIES KEEP THEMSELVES ROOTED BY TWO ANAL-HOOKS, + CONSTANTLY SECRETE AN AMBIOTIC, TO KEEP AWAY COMPETING BACTERIA + FUNGUS!!
